

GN Espace offers expertise in the design and fitting out of Superyacht galleys. Whether you are designing a new yacht or refitting an existing one, we will help you create a galley that meets the needs of the most exacting client.

Our key objective is to create a galley space and on-board hospitality system that allows the Chef to provide the highest quality food, hygienically,

safely and efficiently. Firstly, we will work with you and your client to understand the exact catering needs. Next, we will develop the food-flow process and finally define the equipment requirement to meet the culinary and budgetary objectives. As well as our own in-house team we work together with a Michelin star chef, restaurateurs and leading catering equipment manufacturers to design and supply a galley and hospitality system that is second to none.

Rieber

GN Espace is the marine industry sole distributor for **Rieber**, the leading German manufacturer of professional catering systems. We can offer an extensive range of Rieber sinks and serving stations based around Gastronorm dimensions, and a wide choice of the containers themselves.

GN Espace also supplies the full range of galley equipment, laundry equipment and stainless steel furniture from **Metos Marine**—a world leader in supply of highest quality marine catering equipment.

Miele

We are sole distributor to the Superyacht and Marine industry for **Berbel Abluftechnik** - a manufacturer of highly innovative galley ventilation systems.

Miele Marine appliances offer unparalleled quality, impeccable craftsmanship and are regarded as a global benchmark. Their broad product offer includes a full range of domestic appliances, as well as specialist commercial laundry and dishwashing equipment for large Superyachts.

GN Espace can truly provide a complete one stop solution for any size of galley installation.
